PROFESSIONAL SUMMARY

Senior Software Engineer and Technical Lead with 11 years of experience in web application development, specializing in Vue.js, frontend architecture, and complex API-driven interfaces, with React, TypeScript, and full-stack experience. Lead and guide 10–15 frontend developers across multiple projects, setting technical direction, development standards, and code quality. Work directly with clients and cross-functional teams from requirements and architecture through deployment and production support.

PROFESSIONAL EXPERIENCE

Sideline Technologies (PVT) LTD

Senior Software Engineer | Jan 2025 – Present

- Lead and mentor 10–15 frontend developers across multiple projects, providing technical direction, implementation guidance, and problem-solving support.
- Own frontend architecture and technical decisions; standardize reusable components, code organization, coding conventions, Git workflows, and code review practices.
- Develop applications using Vue 3, Composition API, TypeScript, PrimeVue, and Tailwind CSS; review, approve, and merge pull requests for maintainability and consistency.
- Translate client and product requirements into practical technical solutions with designers, QA, backend, and DevOps teams; coordinate releases and resolve production issues across APIs, integrations, and application configuration.
- Participate in sprint planning and estimation, aligning team capacity and technical scope with delivery timelines across multiple concurrent projects.

OHS Technologies

Software Engineer | Dec 2015 – Jan 2025

- Built and maintained healthcare, e-commerce, education, communication, and business applications across frontend, backend, mobile, and web technologies.
- Served as a major frontend contributor to Genemedics EMR/ERP, developing healthcare and operational workflows with Vue.js, Nuxt.js, Vuetify, Vuex, REST APIs, and realtime integrations.
- Developed Node.js/Express and PHP/Laravel services and integrations with RingCentral, Auth0, Magento, WooCommerce, Microsoft APIs, Google APIs, and shipping services.
- Contributed to mobile and e-commerce initiatives using Flutter, WordPress, and Magento, extending platform reach beyond core web applications.
- Participated in deployments, code reviews, maintenance, and production troubleshooting; guided and supported 3–4 developers during the later years of the role.

TECHNICAL SKILLS

Frontend: Vue.js (2/3), Nuxt.js, React, TypeScript, JavaScript, Composition API, Vuex, Pinia, Vue Router, HTML5, CSS3, Vuetify, PrimeVue, Tailwind CSS, Bootstrap

Backend and databases: Node.js, Express.js, PHP, Laravel, REST APIs, MySQL, MariaDB, MongoDB, SQL Server

Integrations and platforms: RingCentral, Auth0, GetStream, WooCommerce, Magento 1.9, WordPress, FullCalendar, Calendly, Highcharts, PDFKit, PDFMake, Flutter, Electron

Engineering and delivery: Frontend architecture, reusable components, code review, mentoring, requirement analysis, Git, GitHub, CI/CD, Docker, Vercel, Netlify, deployment, Jira, Slack

AI-assisted development: Cursor, Claude, ChatGPT, Gemini; prompting, code analysis, debugging, refactoring, and technical research

SELECTED PROJECTS

TrainingsManager | Technical Lead / Frontend Lead

Vue 3, TypeScript, Vite, Pinia, PrimeVue, Tailwind CSS; Ruby on Rails API, LCON, Mollie

- Lead frontend development of a production sports training-management platform covering planning, enrollments, attendance, packages, invoicing, communications, and role-based access.
- Own architecture, reusable patterns, PR review, and release coordination; develop planning, strippenkaart, and role-switching workflows and coordinate Rails API and iDEAL/SEPA payment flows.

Lulu Chat | Frontend Lead / Technical Owner

Vue 3, TypeScript, Pinia, PrimeVue, Tailwind CSS, GetStream Chat and Video, PWA, Azure

- Led frontend engineering of a multi-tenant sports communication platform; designed architecture, application state, authentication, feature flags, and tenant functionality.
- Delivered messaging, threads, audio/video huddles, administration analytics, user management, attachments, and PWA support; integrated GetStream services and coordinated releases and fixes.

Genemedics EMR/ERP | Software Engineer / Major Frontend Contributor

Vue.js, Nuxt.js, Vuetify, Vuex, REST APIs, EWD/Socket.IO, RingCentral, UPS/FedEx, Magento

- Developed major clinical and operational workflows, including UPS/FedEx label creation, tracking, voiding, pharmacy/patient shipping flows, dashboards, and logs.
- Built Conversations, EMR Timeline, multi-patient tabs, initial ticketing interfaces, EHP ordering, Taskman/ToDo, and scheduling enhancements; integrated backend APIs and realtime services.

SilverState Sync | Full-Stack Developer / Sole Developer

Vue 3, Node.js, Express.js, MongoDB, Redis, BullMQ, WooCommerce, WordPress REST APIs

- Built a multi-tenant catalog and order synchronization platform end-to-end, including backend APIs, authentication/RBAC, tenant configuration, and a Vue administration interface.
- Implemented product, inventory, taxonomy, and image synchronization with WooCommerce and WordPress; designed locked, resumable Redis/BullMQ pipelines and deployed for live stores.

Happy Veggie Moestuinplanner | Full-Stack Developer / Technical Owner

React, Node.js, Express.js, MongoDB, OpenAI, Gemini, Klaviyo, AWS, Docker

- Developed an AI-assisted Dutch garden planner with personalized plans, layouts, calendars, and care guidance; built backend AI workflows, plant search, and transactional plan generation.
- Implemented authentication, security middleware, API validation/documentation, email and Klaviyo integration; developed plant selection, localization, generated reports, and PDF output.

SalesPro ERP | Software Engineer / ERP Customization Developer

Laravel, PHP, MySQL, Blade, Bootstrap, jQuery, Spatie Permission

- Extended an existing Laravel POS/inventory ERP with commissions, bulk warehouse transfers, inventory controls, stock valuation, accounting enhancements, and IPG payment functionality.
- Implemented device-bound licensing, expiry controls, and role-based permissions; enhanced POS, returns, invoices, purchasing, and deployment within the existing ERP architecture.

BullsAI (Vandaglas) | Security & Integration Contributor

React, TypeScript, Node.js, Azure, OpenAI/Azure OpenAI

- Strengthened authentication and session security for an internal AI-powered B2B quoting platform, including protected routes, error handling, and secure session lifecycle management.
- Resolved false-logout issues by remapping upstream API failures and clarifying genuine authentication failures from transient errors.
- Led secret-scanning remediation (TruffleHog) and removed hardcoded credentials, reducing security exposure across the codebase.

EDUCATION

Master of Computer Science (MCS) | The Islamia University of Bahawalpur | 2013 – 2015
